

**Amendments to the Claims:**

Please cancel claims 25 – 38 without prejudice. Please add new claims 39-50. The following listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-38 (canceled)

39 (new): A method of co-ordinating delivery of Internet content to a user of a computing device, comprising:

displaying a menu of user selectable items; and

in response to selection of one of the user selectable items, displaying information outside of a window of a Web browser program through a user interface of which functionality and appearance is defined at least in part by data that is programmed in a format readable by a Web browser program.

40 (new): The method of claim 39, further comprising:

in response to selection of a second one of the user selectable items, displaying second information outside of a window of a Web browser program through a second user interface of which functionality and appearance is defined at least in part by second data that is programmed in a format readable by a Web browser program.

41 (new): The method of claim 39, further comprising:

in response to selection of one of the user selectable items, retrieving the information to be displayed from a computer memory.

42 (new): The method of claim 41, further comprising:

in response to selection of the selectable item, retrieving the data that defines at least in part the user interface from the computer memory.

43 (new): The method of claim 41, further comprising:

in response to selection of one of the user selectable items, retrieving the information to be displayed from a URL address.

44 (new): The method of claim 43, further comprising:

in response to selection of the selectable item, retrieving the data that defines at least in part the user interface from a second URL address.

45 (new): A computer program product comprising a computer readable storage medium and a computer program mechanism embedded therein, the computer program mechanism operable to cause a computer device to present Internet content, the computer program mechanism comprising:

computer readable instructions for causing the computer device to display a menu of user selectable items;

computer readable instructions for causing the computer device to display, in response to selection of one of the user selectable items, information outside of a window of a Web browser program;

computer readable instructions for causing the computer device to provide a user interface for the information, wherein functionality and appearance of the user interface is defined at least in part by data that is programmed in a format readable by a Web browser program.

46 (new): The computer program product of claim 45, further comprising:

computer readable instructions for causing the computer device to display, in response to selection of a second one of the user selectable items, second information outside of a window of a Web browser program; and

computer readable instructions for causing the computer device to provide a second user interface for the second information, wherein functionality and appearance of the second user interface is defined at least in part by second data that is programmed in a format readable by a Web browser program.

47 (new): The computer program product of claim 45, further comprising:

computer readable instructions for causing the computer device to retrieve, in response to selection of one of the user selectable items, the information to be displayed from a computer memory.

48 (new): The computer program product of claim 47, further comprising:

computer readable instructions for causing the computer device to retrieve, in response to selection of one of the user selectable items, the data that defines at least in part the user interface from the computer memory.

49 (new): The computer program product of claim 47, further comprising:

computer readable instructions for causing the computer device to retrieve, in response to selection of one of the user selectable items, the information to be displayed from a URL address.

50 (new): The computer program product of claim 49, further comprising:

computer readable instructions for causing the computer device to retrieve, in response to selection of the selectable item, the data that defines at least in part the user interface from a second URL address.
